

General

I have placed an order for insurance on your site. While going to the payment page, there was a problem with my internet connection/ computer. Do I have to place the order again?

No, your order is saved and you can retrieve it. You can either access it from the order confirmation mail that we send you when you place an order. Click on the view/modify your order option. Or visit the home page of our website, click on track your order option on the left hand side, put your order no. and submit; your order will open and you can proceed for payment.
