

Claim Process

What is the benefit of carrying a health card?

The benefit of carrying the Health Card is that you and your family members get access to the cash less facility from the TPA's network of hospitals. This means you can walk into any of the networked hospitals across the country and get treated without having to pay for your bills first and then claim form us. If you do not get admitted to a networked hospital, your expenses will be reimbursed within 7 days of receipt of complete documents from you. Also in the event of any unforeseen accident a third party can identify your Insurance Company and your family can be intimidated.
